**ON-DEMAND
OPERATIONS & INTELLIGENCE (MO&I) TECHNICAL REPORT
TLP-AMBER**

INSPIRA HEALTH NETWORK

November 29, 2022

USA | PANAMA | ARGENTINA | MEXICO | COLOMBIA | PERU | CHILE | ECUADOR
TEL: +1 (609) 651-4246 | +1(321)430-0500 | +(507) 836-5355

About This Report

This on-demand technical report is compiled for the people with responsibility for Cyber Security, Networking, Databases, Compliance, Infrastructure and Systems. A more detail monthly report is prepared and available from the Orchestration platform (GMP). For any questions about this report please contact the GLESEC Operation Centers (GOCs).

Managed Vulnerability Service (MSS-VM) Section

The Managed Vulnerability Service (MSS-VM) is a “Security as a service” (SaaS) offering to identify network assets, test, validate, correlate and report on vulnerabilities in a lifecycle process that integrates with GLESEC’s Orchestration platform. This integration provides for the optimization of the time and costs it takes an organization to remediate its business relevant vulnerabilities.

The Risk Value (see definition below) for Inspira Health Network for this period can be seen in the following chart.

VULNERABILITY LEVEL COLOR

The following table indicates the vulnerability metrics including total discovered systems, total vulnerable systems, and Risk Value (RV). The RV is defined as a weighted average of vulnerabilities.

The following values are to clarify the RV:

RV=1 Points to every IP address in the infrastructure that is susceptible to attacks

RV=0 Points to no IP address in the infrastructure that is susceptible to attacks

RV=0.1 Points to 1/10 IP address in the infrastructure that is susceptible to attacks

TOTAL DISCOVERED HOSTS

57

TOTAL VULNERABLE HOSTS

22

EXECUTIVE SUMMARY RISK DISTRIBUTION

Scanner	critical	high	medium	low	Total
Inspira Health Network	3		46	6	55

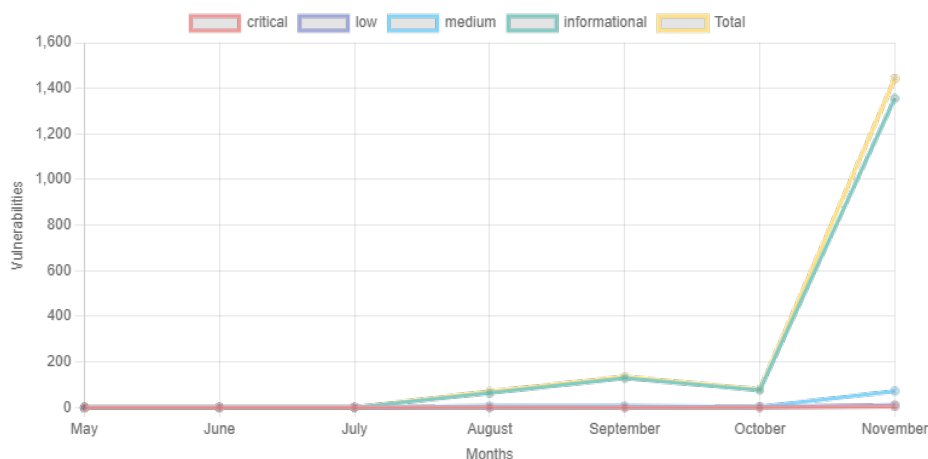

All the vulnerabilities found in your organization belong to the following categories:

The following graphs show the histograms for the last 6 months: Vulnerability Histogram, Vulnerability/Severity, Discovered Network Assets and the last one shows the Comparison of the number of Vulnerabilities between the Previous Month and the Current Month

VULNERABILITY HISTOGRAM - FOR 6 MONTHS

VULNERABILITY SEVERITY HISTOGRAM - FOR 6 MONTHS

DISCOVERED NETWORK ASSET HISTOGRAM - FOR 6 MONTHS

COMPARISON VULNERABILITIES

dest	Previous	Current
170.75.32.41	2	4
170.75.32.50	2	4
170.75.33.119	1	0
170.75.33.216	2	4
170.75.33.217	2	4

sip.ihn.org	4	0

The following graphs show the distribution of the vulnerabilities found on your servers or endpoints

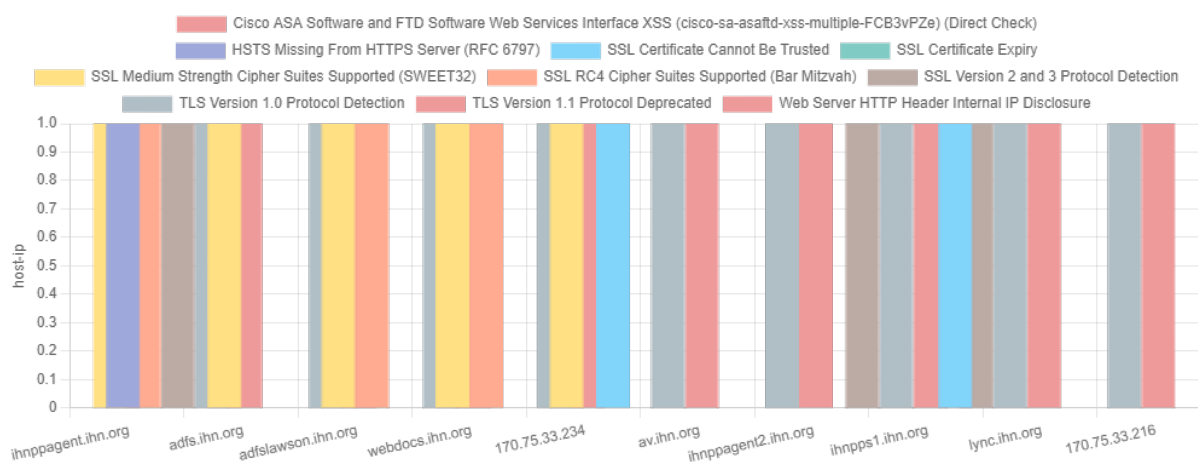

VULNERABILITY CATEGORY BY RISK

This report illustrates the vulnerability category and count by risk discovered this report period

category	critical	low	medium
Service detection	3	0	26
General	0	0	18
Web Servers	0	5	1
CISCO	0	1	0
Windows	0	0	1

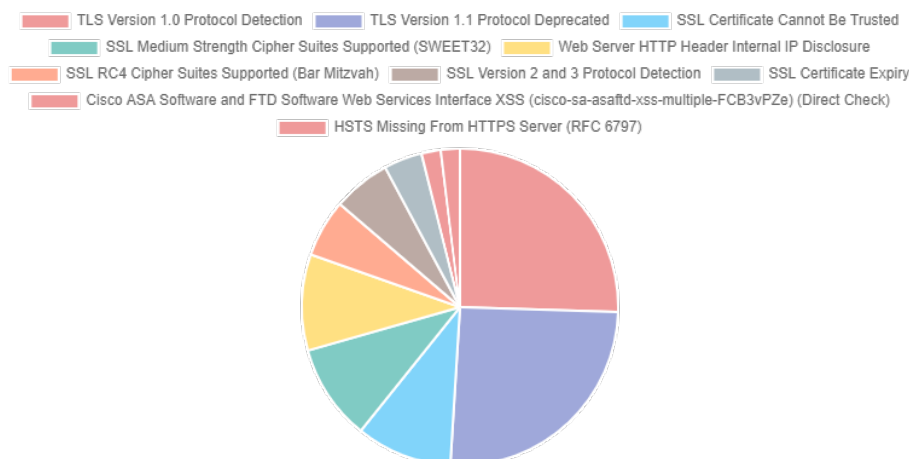

HOST BY VULNERABILITY NAME

This report illustrates the vulnerability name and count by hosts discovered this report period

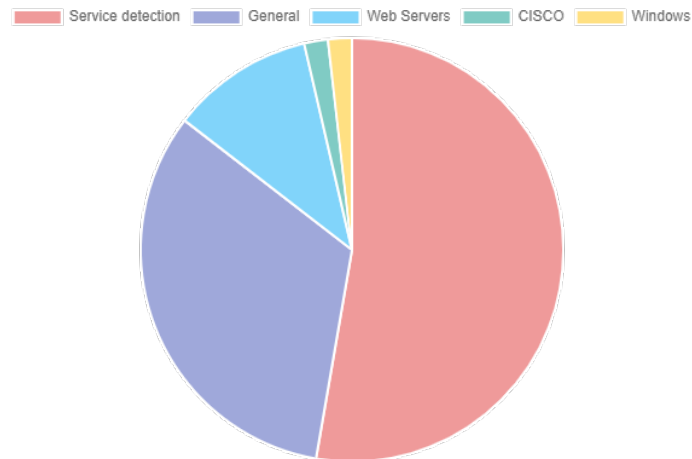

MOST FREQUENT VULNERABILITY NAME

This report depicts the most frequent vulnerabilities discovered this report period

MOST FREQUENT VULNERABILITY CATEGORY

This report depicts the most frequent vulnerabilities by category discovered this report period

The following graphs show the distribution of the vulnerabilities found on your servers or endpoints

HOST BY PROTOCOL

This report illustrates the protocol and count by hosts discovered this report period

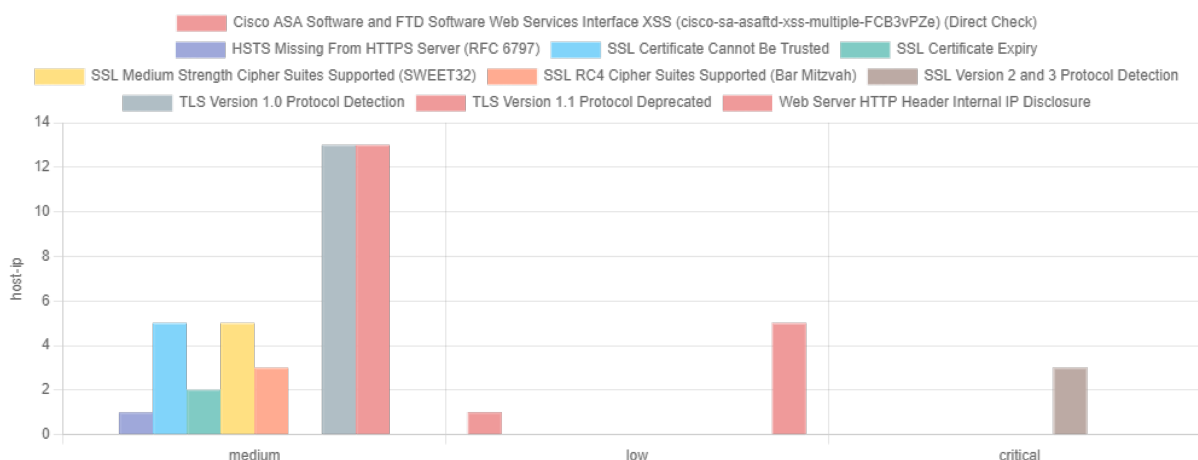

n/a

HOSTS BY RISK

This report illustrates the vulnerability risk and count by hosts discovered this report period

VULNERABILITY RISK BY VULNERABILITY

VULNERABILITY CATEGORY BY PROTOCOL

This report illustrates the vulnerability category and count by protocol discovered this report period

n/a

The following graphs show the distribution of the vulnerabilities found on your servers or endpoints

MOST VULNERABLE HOST

This report depicts the most vulnerable hosts discovered this report period

RISK DISTRIBUTION

This shows the risk distribution of vulnerabilities discovered for this period

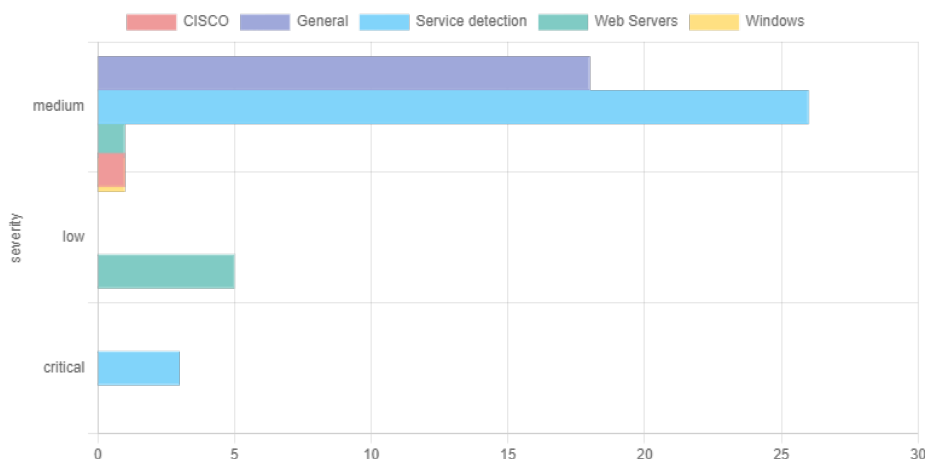

HOST BY VULNERABILITY CATEGORY

This report illustrates the vulnerability category and count by hosts discovered this report period

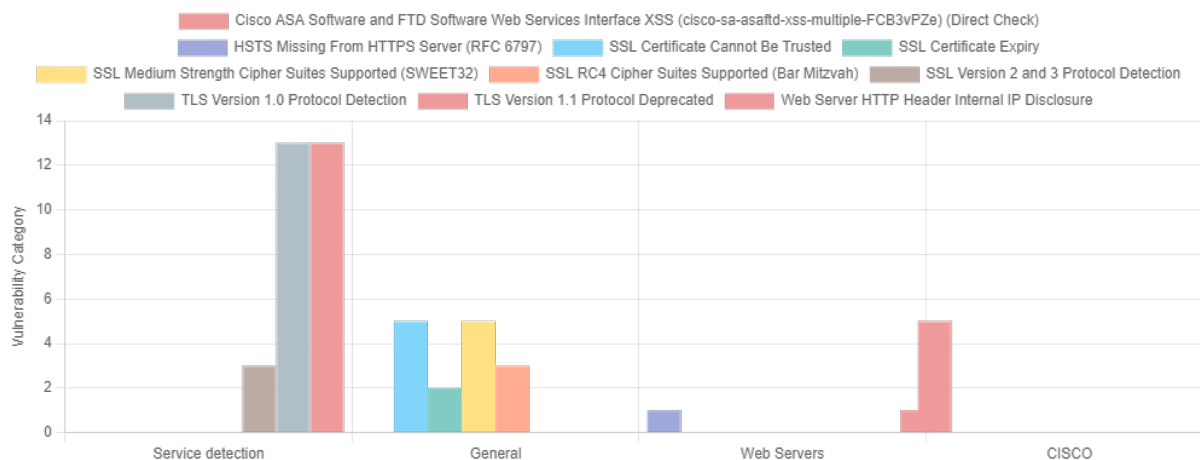

VULNERABILITY RISK BY VULNERABILITY CATEGORY

This report illustrates the vulnerability risk and count by category discovered this report period

VULNERABILITY CATEGORY BY VULNERABILITY NAME

This report illustrates the vulnerability category and count by vulnerability name discovered this report period

The following graphs show the distribution of the vulnerabilities found on your servers or endpoints

VULNERABILITY RISK BY HOST

This graph illustrates the vulnerability risk and count by category discovered this report period

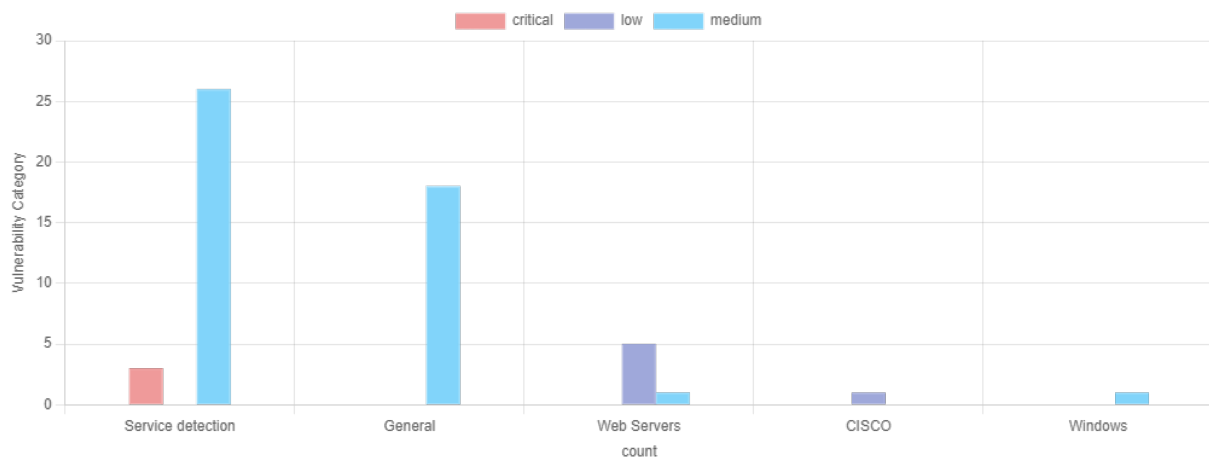

VULNERABILITY RISK BY PORT

This graph illustrates the vulnerability risk and count by port discovered this report period

n/a

VULNERABILITY CATEGORY BY RISK

This graph illustrates the vulnerability category and count by risk discovered this report period

VULNERABILITY CATEGORY BY PORT

This graph illustrates the vulnerability category and count by port discovered this report period

n/a

HOST BY VULNERABILITY RISK

The following illustrates the vulnerability risk and count by hosts discovered this report period

HOST BY PORT

The following graph illustrates the port and count by hosts discovered this report period

n/a

VULNERABILITIES & ASSETS CORRELATION
