TLP AMBER BOARDROOM
EXECUTIVE REPORT

This report corresponds to THIS MONTH and it is directed to Director or VP of IT, Cyber Security, Cyber Security Compliance or equivalent. The information is delivered following the GLESEC`s Seven Elements Cyber Security Model (7eCSM TM), these elements are: Risk, Vulnerabilities, Threats, Assets, Compliance, Cyber Security Validation and Access
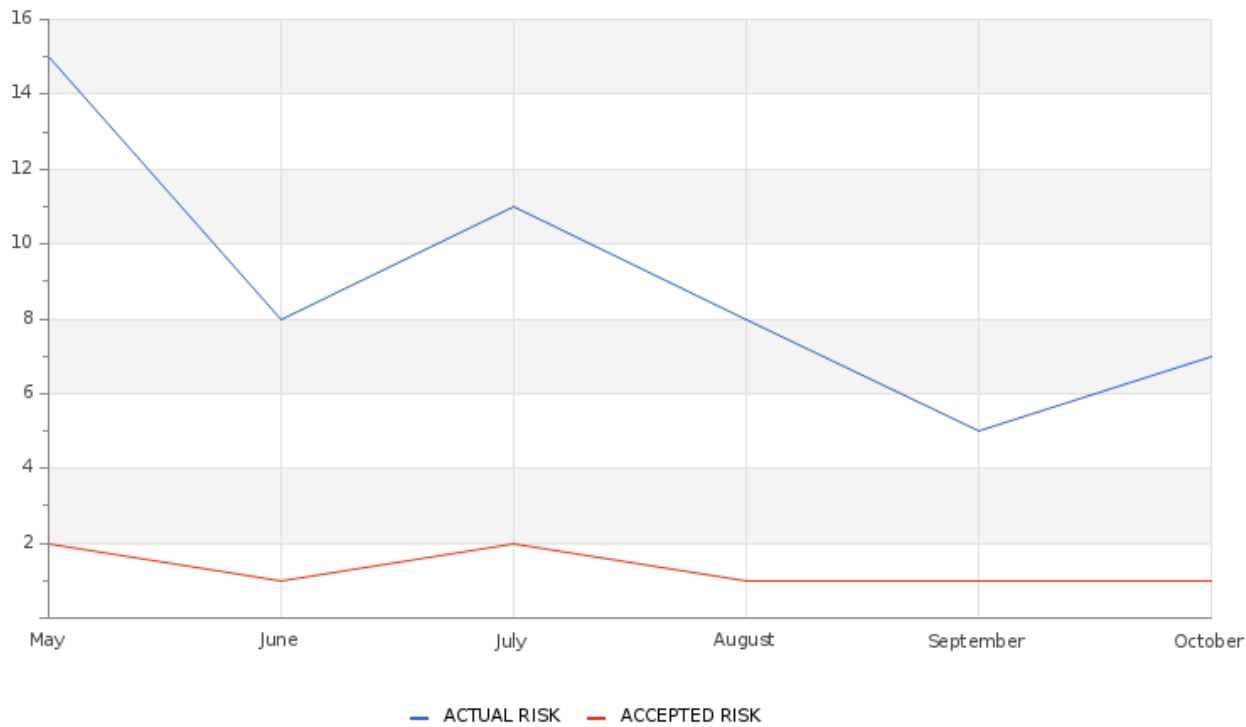

ABOUT THIS REPORT

The purpose of this document is to report on the "state" of security for your organization. It must be noted that GLESEC bases its information analysis on the services under contract. The information generated by these services is then aggregated, correlated and analyzed.

Actual Risk	Accepted Risk	Confidence

Accepted & Actual Risk

The current level of risk has increased compared to the previous month. During the month, the risk stood at 7%, while the accepted risk remained at 1%. Compared to the previous month when the risk was 5%, there has been an increase of 2% when compared to the current risk as can be seen in the graph.

GLESEC 11/16/2023

Hosts & Vulnerable Hosts In Last 6 Months

— Vulnerable Hosts — Total Hosts

During the month the number of hosts discovered was maintained, and there was a slight increase in the number of vulnerabilities present on hosts. Most of the vulnerabilities correspond to application updates and new system patches that need to be applied. The vulnerabilities include security updates to ASP.NET Core, Windows and Linux kernel updates. There are also other lower priority vulnerabilities such as GlobalProtect agent updates, but these need to be addressed as they are an essential part of maintaining enterprise security.

Total Attacks Successfully Blocked

1935

Our systems effectively identified and blocked a total of 1935 attacks, which targeted multiple computers in your organization. Most of the attacks came from malicious IP addresses and botnets.

## Critical Attacks Successfully Blocked

5

During the month, a total of 5 critical attacks were successfully blocked, compared to the previous month with a total of 2 critical attacks, the increase in critical attacks is minimal. Our security systems, which are equipped with the latest detection technologies, have provided a solid defense against emerging threats, thus ensuring the security of our systems.

GLESEC 11/16/2023

Attacks Successfully Blocked

The graph shows a slight increase in blocked attacks during the month. Our security systems have been consistently protecting against DDoS attacks, IoT botnets, phishing, intrusions, zero-day threats, among others.
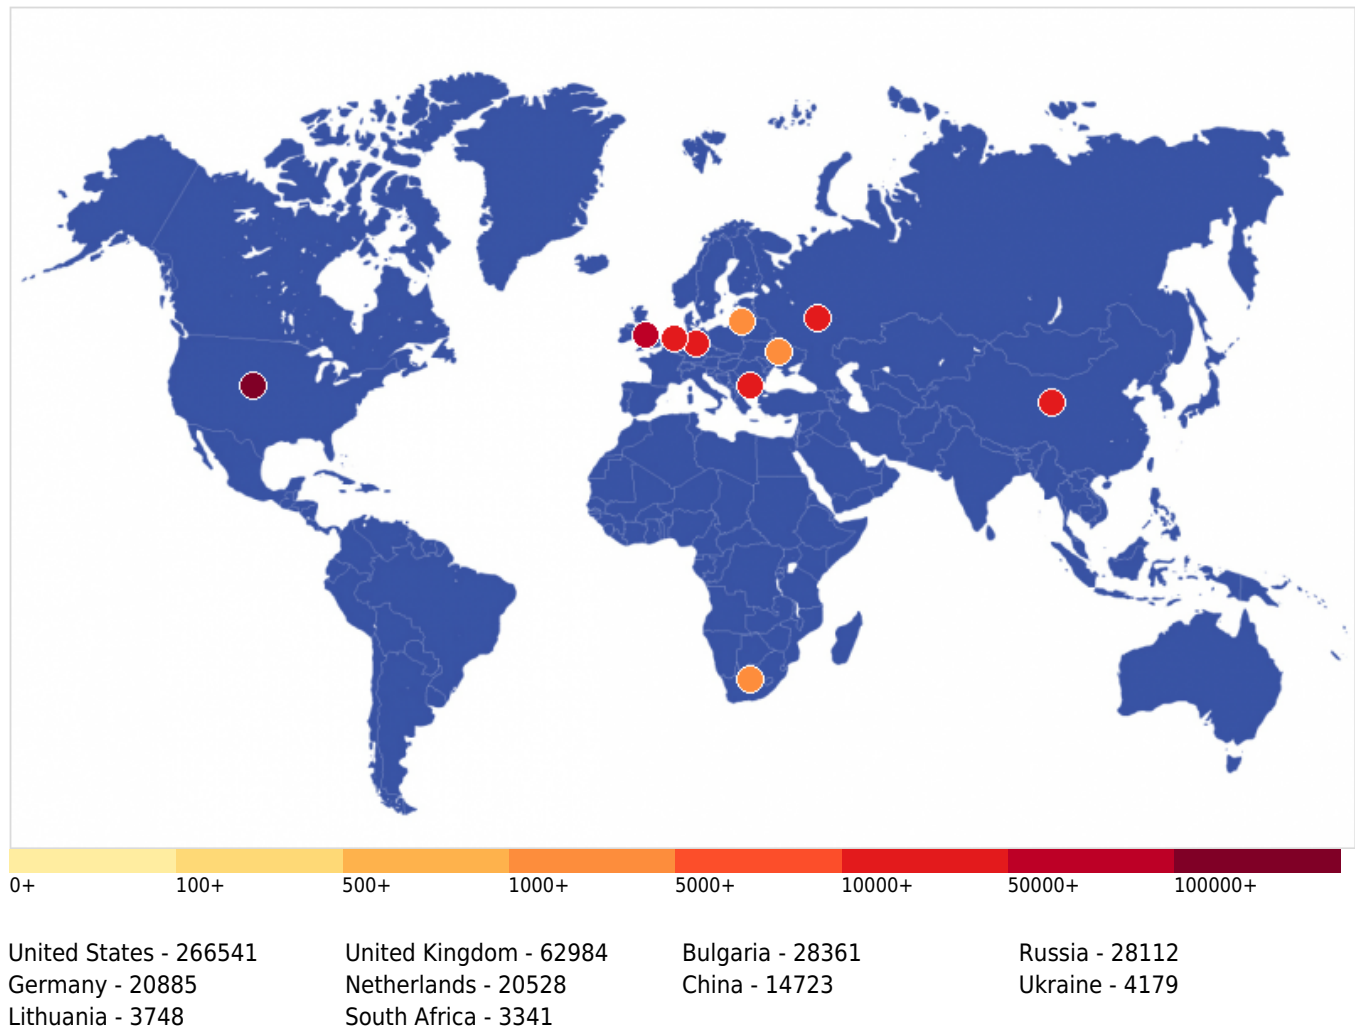

Vulnerability Metric

36

The number of hosts analyzed during the month was 69, of which 50 had vulnerabilities. The vulnerabilities are classified as follows: 55 critical risk, 58 high risk, 164 medium risk and 30 low risk. According to the data provided, the current vulnerability index of your organization is 36%.

Critical Attacks Per Country In Past Week

PROPRIETARY & CONFIDENTIAL   LATAM HQ   US HQ

0+	100+	500+	1000+	5000+	10000+	50000+	100000+

United States - 266541   United Kingdom - 62984   Bulgaria - 28361   Russia - 28112
Germany - 20885   Netherlands - 20528   China - 14723   Ukraine - 4179
Lithuania - 3748   South Africa - 3341

The graph shows the origin of the attacks that have been carried out against the company. Most of these attacks come from the United States, which ranks first with more than 200,000 attacks, followed by the United Kingdom, Bulgaria and Russia, which do not exceed 100,000 attacks. Security strategies should therefore focus primarily on threats originating in the United States, as it accounts for the majority of attacks against the company.
