TLP AMBER CISO **EXECUTIVE REPORT**

This report corresponds to "Mayo 2025" and it is directed to Director or VP of IT, Cyber Security, Cyber Security Compliance or equivalent. The information is delivered following the GLESEC`s Seven Elements Cyber Security Model (7eCSM TM), these elements are: Risk, Vulnerabilities, Threats, Assets, Compliance, Cyber Security Validation and Access

ABOUT THIS REPORT

The purpose of this document is to report on the "state" of security for your organization. It must be noted that GLESEC bases its information analysis on the services under contract. The information generated by these services is then aggregated, correlated and analyzed.

RISK

Actual Risk

10%

The current risk remains at the same level as last month, indicating stability in the presence of active threats. Although the risk remains low and threats targeting the most vulnerable assets are limited, continuous vigilance is recommended to identify any emerging changes in the risk environment.

Accepted Risk

1%

The level of risk accepted remains minimal, reflecting a strict threat mitigation strategy. This approach indicates that proactive risk management continues to be prioritized over risk tolerance.

Confidence

Medium

Confidence in the assessment remains at a neutral level, supported by sufficient information for a reasonable understanding of the risk. However, there is room for improvement in the quality and clarity of the information in order to strengthen future assessments.
