GLESEC 11/16/2023

TLP AMBER BOARDROOM EXECUTIVE REPORT

This report corresponds to THIS MONTH and it is directed to Director or VP of IT, Cyber Security, Cyber Security Compliance or equivalent. The information is delivered following the GLESEC's Seven Elements Cyber Security Model (7eCSM TM), these elements are: Risk, Vulnerabilities, Threats, Assets, Compliance, Cyber Security Validation and Access

ABOUT THIS REPORT

The purpose of this document is to report on the "state" of security for your organization. It must be noted that GLESEC bases its information analysis on the services under contract. The information generated by these services is then aggregated, correlated and analyzed.

Actual Risk**7%****Accepted Risk****1%****Confidence****High**

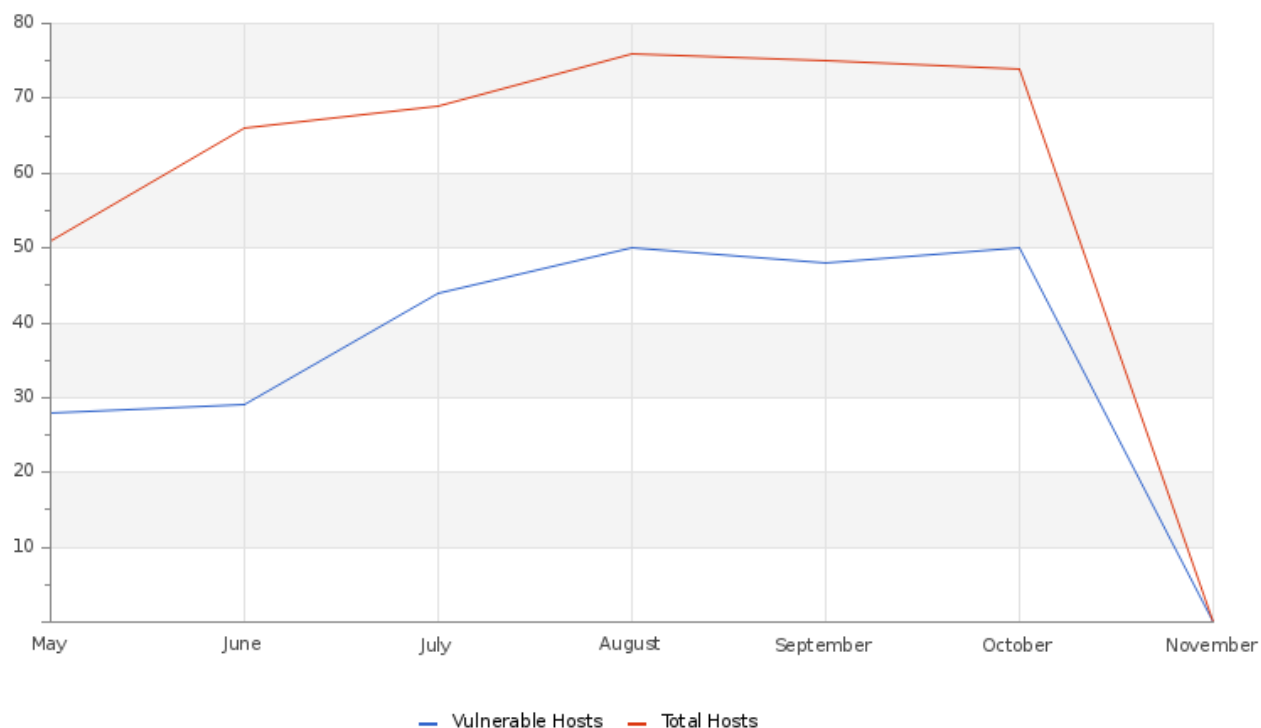

GLESEC 11/16/2023

Accepted & Actual Risk

The current level of risk has increased compared to the previous month. During the month, the risk stood at 7%, while the accepted risk remained at 1%. Compared to the previous month when the risk was 5%, there has been an increase of 2% when compared to the current risk as can be seen in the graph.

GLESEC 11/16/2023

Hosts & Vulnerable Hosts In Last 6 Months

During the month the number of hosts discovered was maintained, and there was a slight increase in the number of vulnerabilities present on hosts. Most of the vulnerabilities correspond to application updates and new system patches that need to be applied. The vulnerabilities include security updates to ASP.NET Core, Windows and Linux kernel updates. There are also other lower priority vulnerabilities such as GlobalProtect agent updates, but these need to be addressed as they are an essential part of maintaining enterprise security.

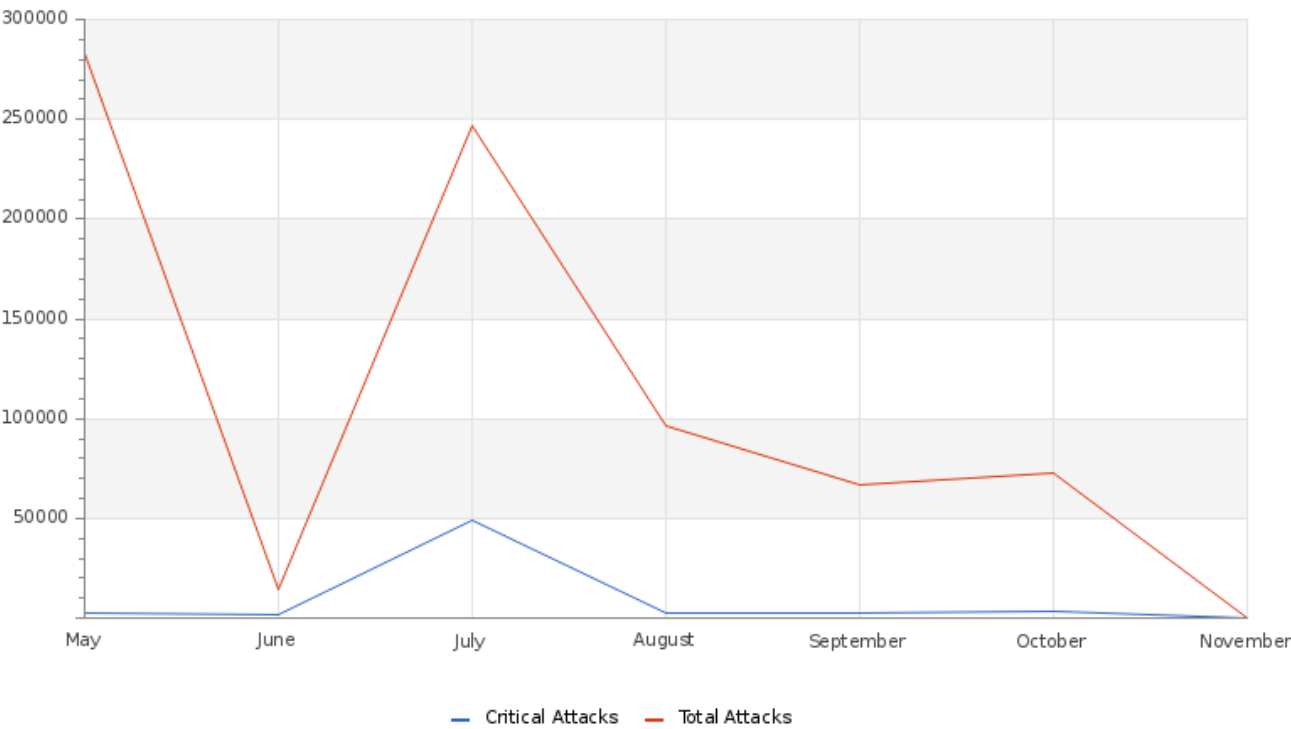

Total Attacks Successfully Blocked**1935**

Our systems effectively identified and blocked a total of 1935 attacks, which targeted multiple computers in your organization. Most of the attacks came from malicious IP addresses and botnets.

Critical Attacks Successfully Blocked**5**
